

Attorney Docket: 920607-95550
Amendment A

I. AMENDMENTS

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1. (Currently amended) A method for modulating blood pressure in a body, comprising the steps of:

providing a treatment member, said treatment member being adapted to be in communication with the body;

providing a plurality of waveform signals representative of waveform signals generated in the body and carried by neurons in the body, said plurality of waveform signals including first waveform signals operative in the control of blood pressure, said plurality of waveform signals being stored in a storage medium;

[[a.]] selecting from [[a]] ~~said storage area one or more waveforms representative of waveforms generated in the body and carried by neurons in the body~~ medium said first waveform signals;

[[b.]] transmitting or conducting the selected waveforms ~~said first waveform~~ to [[a]] ~~said treatment member in contact with the body;~~ and

[[c.]] broadcasting the selected waveforms ~~said first waveform signals~~ from [[the]] ~~said treatment member~~ directly to a blood pressure regulatory point in the body.

Claim 2. (Currently amended) The method according to claim of Claim 1, in which step "a" further includes selecting said waveforms from a wherein said storage [[arca]] medium comprises a memory region in a computer.

Claim 3. (Currently amended) The method according to claim of Claim 1, in which step "b" further comprises wherein said step of transmitting the selected waveforms ~~said first waveform signals~~ comprises remotely transmitting said first waveform signals to [[the]] ~~said treatment member.~~

Claim 4. (Currently amended) The method according to claim of Claim 1, in which step "b" further wherein said step of transmitting said first waveform signals comprises seismic transmission of the selected waveforms ~~said first waveform signals~~ to said treatment member.

Attorney Docket: 920607-95550
Amendment A

Claim 5. (Currently amended) The method according to claim of Claim 1, in which step ~~"b"~~ further comprises the wherein said treatment member is adapted to be implanted within the body.

Claim 6. (Currently amended) An apparatus for modulating blood pressure in a body, comprising:

[[a.]] a source of collected ~~waveforms~~ waveform signals indicative of body organ functioning, said waveform signals including first waveform signals operative in the control of blood pressure;

[[b.]] ~~a treatment member formed to be in direct contact~~ adapted to be in communication with the body, said treatment member being further adapted to broadcast said first waveform signals directly to a blood pressure regulatory point in the body; and

[[c.]] ~~means for transmitting one or more of the collected waveforms~~ a transmission apparatus adapted to transmit said first waveform signals to [[the]] said treatment member; and
~~d. means for broadcasting the collected waveforms from the treatment member to a blood pressure regulatory point in the body to modulate blood pressure.~~

Claim 7. (Currently amended) The apparatus according to claim ~~5~~ of Claim 6, in which wherein said transmitting means transmission apparatus includes a digital to analog converter.

Claim 8. (Currently amended) The apparatus according to claim ~~5~~ of Claim 6, in which wherein said source comprises a computer having said collected waveforms waveform signals stored in digital format.

Claim 9. (Currently amended) The apparatus according to claim ~~7~~ of Claim 8, in which wherein said computer includes separate storage areas for collecting waveforms waveform signals of different blood pressure functional categories.

Claim 10. (Currently amended) The apparatus according to claim ~~5~~ of Claim 6, in which the wherein said treatment member comprises includes an antenna for broadcasting blood pressure said first waveform signals.

Claim 11. (Currently amended) The apparatus according to claim ~~5~~ of Claim 6, in which the wherein said treatment member comprises an electrode.

Claim 12. (Currently amended) The method according to claim ~~5~~ of Claim 6, in which the wherein said treatment member is adapted to be implanted within the body.

Attorney Docket: 920607-95550
Amendment A

Claim 13. (New) The method of Claim 1, wherein said treatment member is adapted to be in contact with the body.

Claim 14. (New) The apparatus of Claim 6, wherein said treatment member is adapted to be in contact with the body.

Claim 15. (New) A method for modulating blood pressure in a body, comprising the steps of:

- providing a treatment member, said treatment member being adapted to be implanted in the body;

- providing a plurality of waveform signals representative of waveform signals generated in the body and carried by neurons in the body, said plurality of waveform signals including first waveform signals operative in the control of blood pressure;

- transmitting said first waveform to said treatment member; and

- broadcasting said first waveform signals from said treatment member directly to a blood pressure regulatory point in the body, whereby the blood pressure is modulated.

Claim 16. (New) The method of Claim 15, wherein said blood pressure regulatory point comprises a point selected from the group consisting of the vagus nerve, hypothalamus region of the brainstem, medulla region of the brainstem and medullopontine region of the brainstem.

Claim 17. (New) An apparatus for modulating blood pressure in a body, comprising:

- a source of collected waveform signals indicative of body organ functioning, said waveform signals including first waveform signals operative in the control of blood pressure;

- a treatment member adapted to be implanted in the body, said treatment member being further adapted to broadcast said first waveform signals directly to a blood pressure regulatory point in the body; and

- a transmission apparatus adapted to transmit said first waveform signals to said treatment member.
